

SAFETY DATA SHEET

Issuing Date 26-Nov-2012

Revision Date 20-Nov-2017

Revision Number 1

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND THE COMPANY/UNDERTAKING

GHS product identifier

Product Name	Chromium Alloyed Stainless Steel grades	
Other means of identification		
Synonyms	405, 409, 410, 416, 420, 429, 430, 434, 439, 441, and 444. This includes all listed grades with letter prefixes and suffixes as well as PRODEC® suffix.	
Recommended use of the chemical and restrictions on use		
Recommended Use	Solid stainless steel products, various forms, and uses	
Uses advised against	No information available	

Supplier's details

Supplier Address Outokumpu Stainless Bar, LLC 3043 Crenshaw Parkway Richburg, SC 29729 TEL: 1-888-458-4600; 1-803-789-5383

Outokumpu Stainless USA, LLC One Steel Drive Calvert, AL 36513 TEL: 1-251-829-3600

Outokumpu Mexinox S.A de C.V AV. Industrias No. 4100 Zona Industrial 1a. Sección 78395, San Luis Potosí, México TEL: +52+444+826-5100

Emergency telephone number

Emergency Telephone	251-829-3600
Number	

2. HAZARDS IDENTIFICATION

Classification

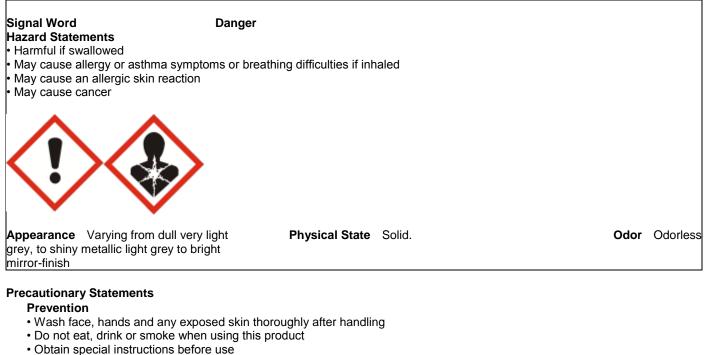

This chemical is not considered hazardous according to the OSHA Hazard Communication Standard 2012 (29 CFR 1910.1200).

Solid metallic products are generally classified as "articles" and do not constitute hazardous materials in solid form. However, downstream use of the article could result in some hazardous elements contained in these products to be emitted under certain processing conditions such as but not limited to: burning, melting, cutting, sawing, brazing, grinding, machining, milling, and welding. The classification given below pertains to these alloys when used during these processes.

Acute Oral Toxicity	Category 4
Respiratory Sensitization	Category 1
Skin Sensitization	Category 1
Carcinogenicity	Category 1B

GHS Label elements, including precautionary statements

Emergency Overview

- Do not handle until all safety precautions have been read and understood
- Use personal protective equipment as required
- Avoid breathing dust/fume/gas/mist/vapors/spray
- · In case of inadequate ventilation wear respiratory protection
- · Contaminated work clothing should not be allowed out of the workplace

General Advice

· IF exposed or concerned: Get medical attention/advice

Skin

- · IF ON SKIN: Wash with plenty of soap and water
- If skin irritation or rash occurs: Get medical advice/attention
- · Wash contaminated clothing before reuse

Inhalation

- IF INHALED: If breathing is difficult, remove to fresh air and keep at rest in a position comfortable for breathing
- · If experiencing respiratory symptoms: Call a POISON CENTER or doctor/physician

Ingestion

- IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell
- Rinse mouth

Storage

• Store in accordance with local/regional/national regulations.

Disposal

• Dispose of in accordance with local/regional/national regulations.

Hazard Not Otherwise Classified (HNOC)

Not applicable

Other information

No information available.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Synonyms

405, 409, 410, 416, 420, 429, 430, 434, 439, 441, and 444. This includes all listed grades with letter prefixes and suffixes as well as PRODEC® suffix.

Chemical Name	CAS-No	Weight %	Trade secret
Iron	7439-89-6	Balance	*
Chromium	7440-47-3	10.5-19.5	*
Molybdenum	7439-98-7	0-2.5	*
Manganese	7439-96-5	0-1.25	*
Silicon	7440-21-3	0-1.0	*
Nickel	7440-02-0	0-0.75	*
Copper	7440-50-8	0-0.6	*
Cobalt	7440-48-4	0-0.6	*

*The exact percentage (concentration) of composition has been withheld as a trade secret.

4. FIRST AID MEASURES

Description of necessary first-aid measures

General Advice	In its solid form stainless steel does not present an inhalation, absorption, or ingestion hazard. Grinding, polishing, abrasive blasting, hot rolling, hot forging, thermal cutting, or
	welding may produce stainless steel dust or fumes containing complex or mixed oxides (spinels) of its components. Metal dust particles may cause eye, skin and/or respiratory system irritation. The below information is for these instances.
Eye Contact	Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.
Skin Contact	Wash off immediately with soap and plenty of water. In the case of skin irritation or allergic reactions see a physician.
Inhalation	Move to fresh air. If breathing is difficult, give oxygen. Consult a physician.
Ingestion	Not an expected route of exposure. If swallowed: Get medical attention.
Most important symptoms/effects, a	acute and delayed
Most Important Symptoms/Effects	Coughing and/ or wheezing. Difficulty in breathing. Irritation. May cause allergic skin reaction.
Indication of immediate medical atte	ention and special treatment needed, if necessary
Notes to Physician	May cause sensitization by inhalation and skin contact. Treat symptomatically.
	5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media

Use extinguishing measures that are appropriate to local circumstances and the surrounding environment.

Unsuitable Extinguishing Media None

Specific Hazards Arising from the Chemical

Avoid dust formation. Dust can form an explosive mixture in air. May cause sensitization by inhalation and skin contact.

Explosion Data Sensitivity to Mechanical Impact Sensitivity to Static Discharge

None. None

Protective Equipment and Precautions for Firefighters

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures Personal Precautions Avoid dust formation. Avoid inhalation of dust. Ensure adequate ventilation. In case of insufficient ventilation wear suitable respiratory equipment. Use personal protective equipment. Avoid contact with skin, eyes and clothing. Environmental Precautions **Environmental Precautions** Not applicable to steel in solid state. Follow applicable federal, state and local regulations Methods and materials for containment and cleaning up Methods for Containment Prevent further leakage or spillage if safe to do so. Cover dust spill with plastic sheet or tarp to minimize spreading. Methods for Cleaning Up Take up mechanically and collect in suitable container for disposal. Avoid dust formation. Clean contaminated surface thoroughly. 7. HANDLING AND STORAGE Precautions for safe handling Handling Handle in accordance with good industrial hygiene and safety practice. Avoid dust formation. Avoid breathing dust. Avoid contact with skin, eyes and clothing. Wear personal protective equipment. Do not eat, drink or smoke when using this product.

Conditions for safe storage, including any incompatibilities

Storage Store in accordance with local regulations.

Incompatible Products May react in contact with strong acids to release gaseous acid decomposition products, e.g. hydrogen, oxides of nitrogen. Use of strong oxidizers (high pH) on stainless steel may cause Cr(VI) compounds to form at ambient temperatures.Decomposition: Fumes generated during welding, brazing, or thermal cutting may contain: chromium compounds, including hexavalent chromium Cr(VI); nickel; manganese; iron; molybdenum; and silicon compounds.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Control parameters

Exposure Guidelines

There are no occupational exposure limits for stainless steels. Occupational exposure limits apply to some components resulting from grinding, polishing, abrasive blasting, hot rolling, hot forging, thermal cutting, or welding which may produce stainless steel dust or fumes.

Chemical Name	ACGIH TLV	OSHA PEL	NIOSH IDLH
Molybdenum 7439-98-7	TWA: 10 mg/m ³ inhalable fraction TWA: 3 mg/m ³ respirable fraction	(vacated) TWA: 10 mg/m ³	IDLH: 5000 mg/m ³

Appropriate engineering controls

Engineering Measures

Ensure adequate ventilation, especially in confined area (i.e. showers, eyewash stations, etc.).

Individual protection measures, such as personal protective equipment

Eye/Face Protection Skin and Body Protection Respiratory Protection	When processing the metal alloy wear: Tightly fitting safety goggles. When processing the metal alloy: Wear protective gloves/clothing. If exposure limits are exceeded or irritation is experienced, NIOSH/MSHA approved respiratory protection should be worn. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current local regulations.
Hygiene Measures	Handle in accordance with good industrial hygiene and safety practice.

9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Physical State	Solid	Appearance	Varying from dull very light grey, to shiny metallic light grey to bright mirror-finish
Odor	Odorless	Odor Threshold	No information available
Property pH Melting Point/Range Boiling Point/Boiling Range Flash Point Evaporation rate Flammability (solid, gas) Flammability Limits in Air upper flammability limit lower flammability limit lower flammability limit Vapor Pressure Vapor Density Relative Density Specific Gravity Water Solubility Solubility in other solvents Partition coefficient: n-octand Autoignition Temperature Decomposition Temperature	No data available No data available	2498-2768 °F Remarks/ - Met None known None known	<u>hod</u>
Viscosity	No data available	None known	

Flammable Properties	Not flammable
Explosive Properties Oxidizing Properties	No data available No data available
Other information	
VOC Content (%)	No data available

10. STABILITY AND REACTIVITY

Reactivity

No data available. Chemical stability

Stable under recommended storage conditions.

Possibility of hazardous reactions

None under normal processing.

Conditions to avoid

Dust formation.

Incompatible materials

May react in contact with strong acids to release gaseous acid decomposition products, e.g. hydrogen, oxides of nitrogen. Use of strong oxidizers (high pH) on stainless steel may cause Cr(VI) compounds to form at ambient temperatures.Decomposition: Fumes generated during welding, brazing, or thermal cutting may contain: chromium compounds, including hexavalent chromium Cr(VI); nickel; manganese; iron; molybdenum; and silicon compounds.

Hazardous decomposition products

None known based on information supplied.

11. TOXICOLOGICAL INFORMATION

Information on likely routes of exposure

Product Information	In its solid form stainless steel does not present an inhalation, absorption, or ingestion hazard. Grinding, polishing, abrasive blasting, hot rolling, hot forging, thermal cutting, or welding may produce stainless steel dust or fumes containing complex or mixed oxides (spinels) of its components. Metal dust particles may cause eye, skin and/or respiratory system irritation. The below information is for these instances.
Inhalation	May cause irritation of respiratory tract. Inhalation of fumes may cause metal fume fever, which is characterized by flu-like symptoms with metallic taste, fever, chills, cough, weakness, chest pain, muscle pain and increased white blood cell count. May cause allergy or asthma symptoms or breathing difficulties if inhaled.
Eye Contact	Contact with eyes may cause irritation.
Skin Contact	Contact with dust can cause mechanical irritation or drying of the skin. Repeated or prolonged skin contact may cause allergic reactions with susceptible persons.
Ingestion	May cause irritation

Chemical Name	LD50 Oral	LD50 Dermal	LC50 Inhalation
Iron	= 984 mg/kg (Rat)	-	-

Manganese	= 9 g/kg (Rat)	-	-
Silicon	= 3160 mg/kg (Rat)	-	-
Nickel	> 9000 mg/kg (Rat)	-	-
Cobalt	= 6170 mg/kg (Rat)	-	> 10 mg/L (Rat)1 h

Symptoms related to the physical, chemical and toxicological characteristics

Symptoms

No information available.

Delayed and immediate effects and also chronic effects from short and long term exposure

Sensitization Mutagenic Effects Carcinogenicity

May cause sensitization by inhalation and skin contact

enic Effects

No information available. The table below indicates whether each agency has listed any ingredient as a carcinogen.

Chemical Name	ACGIH	IARC	NTP	OSHA
Chromium		Group 3		
Nickel		Group 2B Group 1	Reasonably Anticipated	Х
Cobalt	A3	Group 2A Group 2B		Х
eproductive Toxicity	No informati	on available.		

STOT - single exposure
STOT - repeated exposure
Chronic ToxicityNo information available.
No information available.
Elevated temperature processing such as welding and plasma arc cutting may release
hazardous fumes. Overexposure to metal fumes may cause pulmonary edema (fluid in the
lungs) and methemaglobinemia. May also cause pulmonary fibrosis and lung cancer.
Chronic exposure to manganese may cause impairment to the central nervous system
including sluggishness, sleepiness, muscle weakness, loss of facial muscle control, edema,
emotional disturbances, spastic gait, and falling.Target Organ Effects
Aspiration HazardRespiratory system. Skin.
No information available.

Numerical measures of toxicity • - Product

The following values are calculated based on chapter 3.1 of the GHS document:LD50 Oral830 mg/kg; Acute toxicity estimate

12. ECOLOGICAL INFORMATION

Ecotoxicity

The environmental impact of this product has not been fully investigated.

Chemical Name	Toxicity to Algae	Toxicity to Fish	Toxicity to Microorganisms	Daphnia Magna (Water Flea)
Iron	-	LC50 96 h: = 0.56 mg/L semi-static (Cyprinus carpio) LC50 96 h: = 13.6 mg/L static (Morone saxatilis)	-	-
